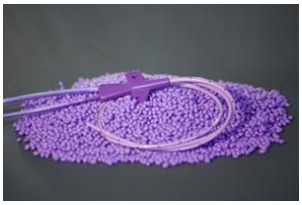
Biomerics Overview and Fact Sheet

Biomerics, headquartered in Salt Lake City, Utah, is a leading and innovative polymer solution provider to the medical device and biotech industries. We specialize in biomaterials, compounds, extrusions, injection molding, and medical device fabrication for the world's leading medical device corporations. We partner with our customers to increase their profitability through material technology, operational excellence, and premier market based customer service.



Biomaterials: Biomerics specializes in the development of biomaterials for in vivo medical applications. Our solutions include biocompatible polyurethanes, biologics, and high performance thermoplastic compounds. Our biomaterial services include material selection, color matching, radiopacifiers, antimicrobials, pharma compounding, and regulatory compliance.

Medical Molding: Biomerics is a custom molder of components for use in medical device and healthcare applications. We have 25 injection molding machines and each month manufacturer over half million parts for our medical customers. We are experts in scientific molding, over molding, insert molding, and automation processes.

Medical Extrusions: Biomerics specializes in the rapid development of high performance medical tubing for in vivo applications. We specialize in co-extrusion, multi-lumen tubing, bump tubing, polyimide tubing, and jacketing. The combination of our material and extrusion capabilities, enable us to quickly develop and commercialize innovative solutions for many of the world leading medical companies.

Medical Devices: Biomerics offers a full range of manufacturing services to build finished medical devices. Our manufacturing capabilities include injection molding, extrusion, welding, tipping, pad printing, soldering, bonding, assembly, and packaging services. Our medical devices are produced in ISO 13485 registered clean rooms under the highest medical standards.

Facts at a Glance:

Name:	Biomerics, LLC
Established:	1994, Privately Held
Executive Team:	Travis Sessions, President & CEO Troy Mohr, VP Business Development Jeff Clark, VP Manufacturing
Headquarters:	2700 South 900 West , Salt Lake City, Utah 84119
Operations:	Salt Lake City, UT and Ashaway, Rhode Island • 115,000 Square Feet Manufacturing and Warehouse Space • 20,000 Square Feet of Class 100,000 Clean Room Manufacturing • 24 Hour Operations
Markets Served:	Cardiovascular, Urology, Imaging & Patient Monitoring, Orthopedic,Minimally Invasive Surgery
Proprietary Materials	Quadrathane®, Quadraflex®, Quadraplast®, Quadraban®
Quality Registrations	ISO 9001:2008; ISO 13485:2003
Web Address	www.biomerics.com
Contact:	Troy Mohr, VP of Business Development, 801-355-2705, tmohr@biomerics.com
