Job Description:

The molding technician is responsible for all aspects of the injection molding process.

Roles and Responsibilities Include:

- Responsible for all aspects of the injection molding process including, but not limited to, set-up and tear down, troubleshooting, equipment maintenance and work flow.
- Working with production personnel and R&D to ensure molded components meet requirements, making adjustments as required.
- Providing molded components in a timely manner in order to ensure production and R&D schedules are met.
- Working with outside vendors to develop tooling and fixtures that result in the manufacturing of high quality products.
- Managing raw molding materials in a way that ensures traceability and prevents contamination.
- Generating documentation on molding runs that can be used to control traceability and ensure reproducibility.
- Working with R&D, Marketing, Quality, and Manufacturing Departments during concept, prototyping, and release of new products.
- Following established procedures in order to maintain a clean and organized environment.
- Drafting and performing mold validations.
- Other assignments as requested.

Requirements:

- High school diploma.
- Minimum of 3 years' experience in injection molding.
- Minimum of 3 years' experience in a medical device manufacturing environment
- Candidate must have good organizational skills.
- Candidate must be proactive and show initiative in taking on and completing injection molding projects.
- Candidate must possess good verbal and written communication skills.
