

## Job Description – R&D Lab Technician

**Job Title:** R&D Lab Technician  
**Company Name:** Biomerics  
**Location:** Salt Lake City, UT  
**Position Type:** Full Time Employee  
**Pay:** Hourly  
**Shift:** Day or Swing

### Company Overview:

Biomerics is a world class contract manufacturer and innovative polymer solutions provider for the medical device and biotech industries. As a vertically integrated company, we specialize in the design, development, and production of medical devices for diagnostic and interventional procedures. We are focused on next-generation solutions for the vascular access, electrophysiology, cardiac rhythm management, neurovascular, structural heart, and cardiovascular markets.

Please explore [our website](#) for more information about our offerings and capabilities.

### Job Description:

Biomerics is looking for an R&D Lab Technician to support new material development in a fast paced R&D and production environment.

### Job Specifics:

- Polymerization and compounding of polyurethanes and other biomedical plastics (R&D lab scale to production scale) and other experiments as part of a project team
- Analytical and functional testing in support of R&D and occasionally production work
- Documentation of work performed in labs book, daily logs, and batch records

### Requirements:

- Detail oriented
- Ability to work with a team or self-directed as required
- Familiarity with general wet lab chemistry techniques
- Able to read and write fluently in English
- Basic computer skills including fluency with MS Office applications
- Familiarity with one or more analytical chemistry techniques (e.g., IR, chromatography, etc.) preferred
- Experience with polymer chemistry preferred
- Associates or Bachelor's degree in chemistry or related field, or equivalent work experience

If you believe that your skills and talents match our needs, please email your resume to [csr@biomerics.com](mailto:csr@biomerics.com).
